JAKE STATLER

Network Administrator // City of Rifle, Colorado

Rifle, Colorado
linkedin.com/in/jake-statler-89aa1a1b6

Self-taught IT professional with 10+ years across K-12 education, healthcare, and local government. At the City of Rifle I've modernized the municipal environment end to end: virtualization, server infrastructure, network switching and firewalls, endpoint security, identity, disaster recovery, and the city's move to a **.gov** domain.

01 CORE SKILLS

VIRTUALIZATION	VMware vSphere / ESXi, vCenter, App Volumes, VergeIO	NETWORKING	Aruba CX, Cisco, Palo Alto NGFW, LAN
SECURITY	Cynet EDR/XDR, CrowdStrike, GPO hardening, Conditional Access, Disaster recovery	IDENTITY & SYSTEMS	Active Directory, Entra ID P1, Windows Server 2008–2019, Email & DNS migration
ENDPOINTS	Quest KACE K2000, OS imaging, macOS, Chromebook, iPad, hardware repair	COLLABORATION	SharePoint administration, user provisioning

02 EXPERIENCE

City of Rifle — Network Administrator

Apr 2023 — Present

I run network and server infrastructure for a Colorado municipality, and have led a full platform refresh: desktops, servers, switching, perimeter security, endpoint protection, identity, and a domain migration to .gov.

2026 — Hypervisor Migration, .gov Domain Rebuild & Disaster Recovery

- Migrating the city's server infrastructure from VMware vSphere to **VergeIO**.
- Rebuilding the entire internal Active Directory domain structure on a **.gov** namespace, and migrating external email to the new .gov domain.
- Leading the city's **disaster recovery** planning, including a documented plan to recover from data loss and remediate it.
- Designing DR infrastructure around a **3-2-1 backup** strategy: three copies of city data, kept across two sites, with one copy offsite.

2025 — Security Posture & Endpoint Strategy

- Led an internal security posture audit of Group Policy, remediating weak or outdated settings.
- Transitioned users from VMware virtual desktops to physical desktops while keeping server workloads on vSphere ESXi.
- Migrated endpoint protection from CrowdStrike EDR to **Cynet EDR/XDR**.
- Designed, refined, and rolled out Microsoft Entra ID P1 **Conditional Access** policies.

2024 — Network & Firewall Replacement

- Replaced all Cisco switching across the city with **Aruba CX** switches.
- Replaced the Cisco ASA perimeter firewall with a **Palo Alto PA-1410** next-generation firewall.

2023 — Desktop & Server Modernization

- Migrated vCenter-hosted virtual desktops from Windows 7 to Windows 10.
- Built VMware **App Volumes** for user profile data, replacing persistent disks.
- Upgraded all server infrastructure from Windows Server 2008 / 2012 R2 to 2016–2019.

Stat Strategies — Founder & Owner · Freelance

Feb 2021 — Present

A self-funded IT consultancy that helps small businesses in Rifle run their own technology well, without outsourcing everything and paying a markup for it.

- Developed a data-driven daily fantasy sports strategy in 2021 that returned **$150K+** in its first year, then used it to self-fund the business.
- Help local small businesses set up better IT management and day-to-day operations.
- Give clients direct access to the tools and software they need, so they don't depend on outsourced providers who mark up every service.

Rifle Gap Land Company — Board Member · Rifle Creek Golf Course

Jun 2023 — Mar 2026

Board member of the nonprofit that operated the Rifle Creek Golf Course. I helped build the case that brought the course and its water rights into city ownership.

`Acreage` **340** `Water rights` **~$970K** `Legacy debt` **~$1.2M** `Rounds / year` **~26K**

- Oversaw golf course operations, including staffing, budget, and long-term strategic planning, within the limits of a ~$1.2M note from the early-2000s clubhouse construction.
- Coordinated with city officials to set up meetings and build the case for a city purchase.
- Showed the value of the property: 340 acres outside city limits with **senior water rights** worth ~$970K. Also showed that ~26K rounds a year plus a new irrigation system could comfortably cover the note.
- Helped oversee the transition of the Rifle Creek Golf Course to city ownership.

Grand River Hospital District — IT Help Desk

Feb 2018 — Mar 2021

- Helped roll out the **Quest KACE K2000** imaging solution, and built and configured the imaging station.
- Managed the organization's **SharePoint** intranet.
- Owned new-user provisioning and account management in Active Directory, and provided day-to-day help desk support for clinical and administrative staff.

Garfield Re-2 School District — Building Technology Coordinator

Mar 2016 — Feb 2018

- Served as the escalation point for any issue the help desk couldn't resolve, across **five schools**.
- Repaired Chromebooks (keyboard, screen, and trackpad replacements), replaced iPad screens, and repaired and re-imaged Macs.
